

# AquaTek Range

## Benefits

- Compact and neat design

## Main Features

- Available as a single zone panel or 4 zone panel
- Typically designed to go into domestic and smaller commercial applications such as luxury apartments or tea points in offices

The AquaTek range is a basic entry level water leak detection system.

AquaTek+: single zone panel with audio and visual output, a single zone panel with BMS (no volt relay) output only

AquaTek Mini: single zone panel, no audio or visual output, with BMS (no volt relay) output only

AquaTek 4: 4 zone panel with audio and visual output, with BMS (no volt relay) output only

The AquaTek units are capable of working with a variety of detection devices including sensor cable, sensor probes and minipad sensors. This means the user is able to connect the alarm units to a detection device that best suits their requirements.

Specification	
Power	240V/110V
Power Consumption	30mA
Output signal	1 x No-Volt Relay
Common Relay Rating	240VAC 8 amp
Dimensions (mm)	80 x 88 x 55
Max Cable Run	30m (combined per zone)
Output Options	BMS/Autodialler/Repeater Panel
Product Code (AquaTek+)	ATK240AV
Product Code (AquaTek Mini)	ATK240Mini

Specification	
Power	240V/110V
Power Consumption	50mA
Output signal	No-Volt Relay (optional 1 per zone)
Common Relay Rating	240VAC 8 amp
Dimensions (mm)	120 x 122 x 60
Max Cable Run	30m (combined)
Output Options	BMS/Autodialler/Repeater Panel
Product Code (AquaTek4)	ATK4/240V
