

GWD

The GWD range of Multizone leak detection systems are designed to monitor for water leaks in critical and vulnerable areas such as data centres and server rooms. The GWD is compatible with a variety of detection devices to monitor for leaks.

Benefits

- The unit is available in a variety of zone options including 1-8, 1-16 and 1-32
- Optional battery backup for 10 hours
- Possible to cover large areas with the Aqualeak sensor cable

Main Features

- Compatible with Sensor Cable, Sensor Probes, Minipad Sensors and Intelligent Water Sensors
- Three levels of indication for each zone; green – 'line healthy', red – 'line fault' and flashing red – 'water detected'
- Typical Applications: Comms rooms, server rooms, data centres, CRAC units, records offices, archive storage

Specification	
Zones	1-8, 1-16, 1-32
Alarms	Audio/Visual (Leak/Line Fault/Power)
Medium	Water
Sensors	Cable/Probe/Minipad/Wall Mount
Outputs	No volt changeover relay/s
Field Sensing Voltage	5V multi-directional
2 x Common Output (relays)	2 Amp
Individual Relays	2 Amp
Max Zone Distance	100m
GWD Code	GWD Followed by number of zones
Battery Back Up Code	BB
