

DWD

The DWD is a compact alarm system that can protect your home from potential water flood damage by placing it anywhere a potential water leak exists – near or beneath a sump pump, plumbing, fridge, dishwasher, washing machine etc. When the sensor probe comes into contact with water, an audible alarm sounds.

Benefits

- Flexible in terms of the location the unit can be placed
- Low maintenance required
- Battery or mains power option
- Compact, neat unit

Main Features

- Loud alarm output of 85db at 2.5m
- Relay output
- Splash proof enclosure
- Compatible with a variety of household appliances including washing machines, dishwashers and fridges

Product Features:	
Loud alarm output of 85dB at 2.5m	
Alarm will last for up to 18 hours	
Battery or Mains Powered	
Low Maintenance	
Relay Output	
Low Battery Alarm	
Product Specification:	
Weight	100g (excluding battery)
Battery Type	9VDC alkaline (Pp3)
Mains Option	240VAC supply transformer
Battery Life	2 years in standby; 18 hours in continuous alarm
Operating Temperature	1 – 50°C centigrade
Humidity	80%RH (non condensing)
Shock Resistance	1.8m drop to concrete
Enclosure Rating	Splash proof but not water proof
Relay Rating	1A at 240VVAC
Dimensions	62mm x 99mm
DWD Code (Battery)	DWD
DWD Code (Mains Power)	DWD-PS
